

PUPPY LINE

VIT AD₃E

Complementary feed for pets

- ✓ HYPOCALCEMIA AND OSTEOPOROSIS PREVENTION
- ✓ IMMUNE RESPONSE STIMULATION
- ✓ METABOLISM OF CALCIUM AND PHOSPHORUS
- ✓ ANTIOXIDANT FUNCTION
- ✓ ANTI-INFLAMMATORY PROPERT
- ✓ SKIN HEALTH AND QUALITY HAIR
- ✓ ANTI-STRESS FUNCTION
- ✓ FERTILITY

VIT AD3E takes full advantage of:

-the Vitamin A in combination with vitamin D3 promotes a proper growth of the long bones, regulates appetite, conjunctival spraying, preventing from dysfunctions associated with blindness as twilight and fertility.

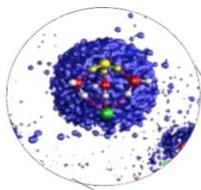

-the vitamin D3 that has a direct activity on the metabolism of calcium absorption in the intestinal tract and transferring to bone, also plays a preventive action on disorders of the bone and promotes a better immune response.

-the Vitamin E that reduces the number of free radicals, slows down the aging process and strengthens the immune system. It also improves the cardiac health

and circulation, promoting the integrity of cell membranes, supports respiratory health and promotes the health of the nervous system and coat by reducing the redness and itching caused by allergies through its anti-inflammatory properties.

VIT AD3E is a high biological and technological nutritional support. It provides its balanced ingredients protected in a lipidic microcapsule that allows the slow release in the intestine bypassing the

degradation in the stomach, a highly acidic environment that denatures the active ingredients, to ensure nutritional integrity all the way down to gut.

GASTRIC BY PASS AND SLOW RELEASE TILL THE END OF THE GUT

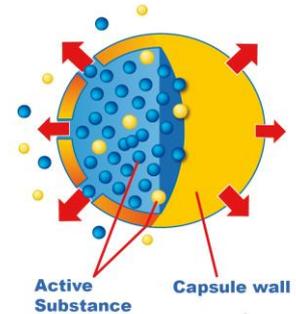

PUPPY LINE

VIT AD₃E

Complementary feed for pets

The microcapsule:

- ✓ encloses and protects the integrity of the active ingredients over time by degradation phenomena caused by atmospheric agents (light, moisture, oxygen, etc..) and oxidation caused by contact with oxidizing substances (iron, copper, choline) normally present in animal feed
- ✓ allows the association of molecules mutually incompatible
- ✓ slowly releases its contents, making it bioavailable and active in the area of gut deputy to absorption and all the way down to gut.

DIRECTIONS FOR USE

VIT AD3 It can be used by mixing traditional to the food, both wet and dry. A mixing occurred is important not to cook the food, as vitamins would be altered.

1° Administration: 6 weeks. Daily administration of 0.50 g per kg up to 44 kg in weight body of the subject. Over 44 kg of weight of the subject, the maximum daily dose is 22 g.

Maintenance: 0.20 gr per kg of body weight of the subject.

Kg Body Weight	1° Administration	Maintenance
10	5 g	3 g
20	10 g	6 g
30	15 g	9 g
40	22 g	12 g
50	22 g	15 g

(1 teaspoon = 4 g, 1 tablespoon = 11 g of product)

Composition: Oils and fats, minerals, natural extracts, antioxidants.

Additives per kg:

Vitamins and pro-vitamins:

E 672 - Vitamin A *micro-encapsulated* 10,000,000 IU

E 671 - Vitamin D3 *micro-encapsulated* 1,000,000 IU

3a700 - Vitamin E (alpha-tocopherol) *micro-encapsulated* 10,000 mg

Analytical Values: crude protein 0.1%, crude oils and fats 95%, crude fiber 0.2%, crude ash 2%.

Packaging: 250 g, 500 g, 1 kg, 3 kg, 5 kg.

Shelf life: 3 years. The deadline is for the product in the original packaging, sealed and stored in cool, dry place.
