NATURAL SCIENCE FOR YOUR ANIMALS

ENERGY

Complementary feed for pets

The microcapsule:

- ✓ encloses and protects the integrity of the active ingredients over time by degradation phenomena caused by atmospheric agents (light, moisture, oxygen, etc..) and oxidation caused by contact with oxidizing substances (iron, copper, choline) normally present in animal feed
- ✓ allows the association of molecules mutually incompatible
- ✓ slowly releases its contents, making it bioavailable and active in the area of gut deputy to absorption and all the way down to gut.

DIRECTIONS FOR USE

Mix Energy with traditional food. Please, after mixing, do not cook the food otherwise contained nutritive principles would be altered.
